## PROFILE SUMMARY

Driven and detail-oriented aspiring RPA Developer with a strong foundation in automation tools and programming. Passionate about designing, developing, and deploying efficient automated workflows to streamline business operations and improve productivity. Eager to apply technical expertise and a continuous learning mindset to contribute to innovative, high-impact solutions. Committed to growing within the RPA field and delivering value-driven results that drive organizational success.

## PROJECTS

### RPA

#### ACME / Calculate Client Security Hash

- Developed an automated process to generate unique security hashes for each client based on their personal information, enhancing data security and integrity. ([github.com/Farahomari1](https://github.com/Farahomari1))

#### ACME / Research Copy of Check

- Created an RPA solution that automates the research and upload of client check copies into the system, streamlining document handling and improving operational efficiency. ([github.com/Farahomari1](https://github.com/Farahomari1))

#### IMDB Project

- This RPA bot suggests the top 10 box office movies to users. Once a movie is selected, the bot fetches and displays detailed information about the chosen movie. ([github.com/Farahomari1](https://github.com/Farahomari1))

### Full Stack

#### Cast Discovery

- Built a platform that connects emerging talent in the dramatic arts with organizations seeking new performers, while fostering a collaborative community for artists to share experiences and collaborate on creative projects. . ([github.com/Farahomari1](https://github.com/Farahomari1))
